

# Drives for Bowl Feeders

## Characteristics

- Available in diameters from 100 mm to 750 mm
- Head plate individually adjustable
- Smooth running, therefore particularly gentle on parts
- High conveying capacity
- Easy to remove drive protection
- Safe transport, even of very light or very heavy parts
- Also for parts with complex geometry, e.g. springs or tangled parts
- Suitable for many materials, even those with high friction: plastic, metal, rubber ...
- Energy-efficient: less energy input with high conveying capacity
- Very good price-performance ratio

## Technical data

SFE 100 -  
SFE 650

**NEW**  
SFE 750
